

Merck uses ASAPIO for Integration with SAP Ariba

Merck choose ASAPIO for the SAP Ariba Buying Integration with their purchase-to-pay processes for over 3,000 users globally. Today five SAP systems at Merck, including SAP ERP® and SAP S/4HANA®, are natively connected with the central SAP Ariba cloud procurement solution. The ability to consolidate and handle master data from multiple SAP systems is a key feature of ASAPIO Integration Add-on.

“ASAPIO’s Integration solution was evident for the project success with Merck’s heterogeneous and complex SAP ERP landscape. We appreciate the product as well as the consulting support from ASAPIO.”
