SAP Fieldglass

SAP Fieldglass ERP Edition – Integration Add-on
# **October 2023 Release Update + Roadmap**

SAP Fieldglass Integration Add-on FP7 (SP8)

v1.1, November 6th, 2023

PUBLIC

ASAPIO   **SAP** Partner

SAP Fieldglass ERP Editions come with ready-to-run integration for SAP ERP customers

SAP Fieldglass

SAP Fieldglass Integration Add-on

SAP S/4HANA
SAP ECC

- ✓ Included in SAP Fieldglass subscription
- ✓ End-to-end integration for master data, PRs, POs, Timesheets, Invoices...
- ✓ Real-time connectivity features
- ✓ Code-less interface extensions
- ✓ Add-on for SAP ECC 6.0+ and SAP S/4HANA
- ✓ For on-prem and private cloud landscapes
- ✓ No separate server required
- ✓ Extensible, for custom data + requirements

Roadmap

April 2024

October 2024

⭐ SAP S/4HANA Lean Services support

⭐ Support Event Hierarchy 2.0
for PM/PS integration

• Non-collaborative SOW integration from PM/PS,
triggering from PO instead of PR

⭐ Additional Lean Services features, e.g.
Accruals for SES

⭐ New PM/PS collaboration process utilizing
RFE/Multi-Bid feature

• Multi-line Work Order integration utilizing
Spend Matrix as new Standard

• Web-based configuration UI

⭐ = Highlight

This document reflects the planning status as of October 2023 and is subject to change at any time at ASAPIO's discretion.

3

Support for SAP S/4HANA Lean Services

ASAPIO plans to include the Lean Services integration scenario for SAP S/4HANA on-prem and private cloud in SAP Fieldglass Integration Add-on.

✓ Customers can choose between MM-SRV or Lean Services integration

✓ Support of mixed scenarios with MM-SRV and Lean Services on different backends

✓ Consistent integration concept during the transformation to SAP S/4HANA

✓ For Contingent Workforce Management and Services Procurement

MM-SRV
For SAP ECC
For SAP S/4HANA

+

Lean Services
For SAP S/4HANA
Private Cloud + On-Prem

Release Update – October 2023
SAP Fieldglass Integration Add-on FP7 (SP8)

October 2023 Release Highlight:
Code-less extension of master data interfaces

You can now use ASAPIO Payload Designer

(built-in) to extend master data interfaces, e.g.

for custom fields, code-less.

Currently supported interfaces:

✓ Legal Entity

✓ Site

✓ Cost Center

✓ Internal Order

✓ Network Order

✓ GL Account Picklist

October 2023 Release Highlight:
Rework failed documents in SAP Fieldglass

New feature:

You can now rework documents in SAP Fieldglass, which failed to be posted successfully in the SAP backend systems, instead of logging on to the SAP ERP system.

E. g. for situations where documents are locked/edited in the backend, wrong cost object selected or other process/booking errors. Supported for the following documents (can be switched on/off per document):

- ✓ Time Sheets
- ✓ Expense Sheets
- ✓ SOW Characteristics
- ✓ Service Receipts
- ✓ Invoices

October 2023 Release Highlight:
PR/PO integration **before work order acceptance**

New feature:

Support to update PR/PO of a resubmitted/reworked work order, after supplier's rejection.

✓ This is an alternative option to the recommended standard integration flow, where work order creates the PR/PO after supplier's acceptance

✓ The feature helps to avoid customization efforts, e. g. at brownfield customers with established processes

✓ Can be switched on with new global parameter FG_PO_BEFORE_ACCEPTANCE

✓ Supported for PR/PO integration flows + Direct PO integration flows

October 2023 Release Highlight:
PO upload to SAP Fieldglass

New feature:

Introducing a new PO upload interface for MM-SRV customers.

✓ A fully collaborated and approved Purchase Order from an SAP ERP system can be uploaded to SAP Fieldglass, creating the SoW

✓ The PO can originate in SAP S/4HANA or SAP ECC, including replicated POs from SAP Ariba Buying

✓ Various triggers to send the PO are configurable (i.e., statuses Released, Changed, Confirmed)
